

Anne Harvey Utah

Our family includes myself. My husband Ron and our two boys. Adam is 15 and Alex is 13. They are awesome, amazing and CRAZY.

Cool stuff about us...

In the fall, Adam will be a Sophomore at Jordan High school and Alex will be in 8th grade at Blessed Sacrament.

Ron is an engineer and manages the Western Reliability Division for Praxair. I am a Hematology Nurse Practitioner at Primary Children's Hospital.

Why volunteer with the Charge Syndrome Foundation?

I want to keep my volunteer efforts close to my heart and build relationships that can support families, friends, kids and siblings that are impacted by CS. It's a hard road many days but knowing that there is support and knowledge to share can pave the path for all of us.

We LOVE living in Utah and take every opportunity we can to soak up all the beauty and adventure that our great state has to offer. There's lots of things to hike on, bike on, ski on, slide on, swim in and look at. We love to camp, cycle, hike, ski, waterski, swim and explore. We have lots of extended family in Utah so we are blessed to have their support and get to spend lots of time with them. We like to get away too and love to travel...our family is finally to the phase where we can get beyond the borders of Disneyland.
