

## Social-Emotional Development in CHARGE Syndrome

You are invited to participate in a study about social-emotional development in CHARGE syndrome being conducted by the CHARGE Syndrome Research Lab at Central Michigan University.

Several of the conditions associated with CHARGE have an impact on the of social-emotional development of these individuals. This study is working to examine the strengths and weaknesses in the social-emotional development in children with CHARGE syndrome, measure when children with CHARGE syndrome are reaching these typical social-emotional milestones compared to their peers, and to explore which interventions are being used to accommodate the needs of each child.

If you are the parent/guardian of a child with CHARGE syndrome under the age of 18, you are eligible to participate. Participation in this project involves answering questions on an anonymous, web-based questionnaire. You can find more details and participate by going to this website link ([https://cmich.co1.qualtrics.com/jfe/form/SV\\_eap5SH7SlA9XZWD](https://cmich.co1.qualtrics.com/jfe/form/SV_eap5SH7SlA9XZWD)). If you are interested in learning more about this project, or if you have questions, send an email to Tim Hartshorne ([harts1ts@cmich.edu](mailto:harts1ts@cmich.edu)) or Mallorie Beavers ([beave1mk@cmich.edu](mailto:beave1mk@cmich.edu)).
