

CHARGE CAREGIVER STUDY

Study Title: Caregiving for Children with CHARGE Syndrome and Related Disabilities

Study Information: We are studying quality of life and similar issues among family/unpaid caregivers of children and youth (ages 1 to 18) who are living with CHARGE syndrome and related disabilities.

We will be asking the participants to complete an online survey lasting 20-25 minutes. Participants can also volunteer to participate in a qualitative interview to answer some follow-up questions. Study questions will cover both caregiving and technology for this population.

Participants who agree to complete the online survey may be selected for the qualitative interview. The interview will also last for approximately 20-25 minutes.

If you would like to participate in this study, kindly indicate your interest by contacting the investigator at the coordinates below:

Dr. Afeez A. Hazzan (ahazzan@brockport.edu)

Thank you for your interest. We look forward to hearing from you.

Sincerely,

Afeez A. Hazzan, MSc, PhD
