

Research:

Feeding and swallowing difficulties in CHARGE patients

Purpose of this study

The aim of the study is to increase our knowledge about the presence, type and severity of feeding- and swallowing difficulties in CHARGE patients.

Nature of Participation

All CHARGE patients are eligible for participation. We request (parents of) CHARGE patients to complete two questionnaires. Completion takes approximately 15 minutes.

What We Ask From You

If you want to participate please come to the research desk and fill out the questionnaires at your preferred time.

Contact Information
